Essay.

School holidays are time when pupils can rest from studies and homework, spend time with their family and friends and just enjoy life in their own pace. Nowdays Russian students have 4 school holidays. They are in autumn, in spring, in winter and the longest one in summer. /4

Speaking about the question: should students have a long summer holiday or should terms be longer, I definately choose the ~~xxx~~ first variant. I consider that it will be better for learning because pupils will have rest from information and homeworks. They will have more time for self-realization, doing their own hobby, getting ready for exams in a particular subject (it is about 9th and 11th grades), because during school homework takes all time. /4

During holidays, you may do a great variety of leisure activities. For example, you can start to read a new interesting book for which you didn't have time before or you will be able to watch a long serial, visit relatives or just lay in bed and sleep. /4

You may say that a long summer holiday can be harmful for children's knowledge. I consider that it all depends on the perconality. For many pupils summer is the best time for learning information which they didn't understand at school in a quite level. /3

In conclusion, I believe that terms shouldn't be longer. It will be better for students to have a long summer holiday for rest and self-realization.

Essay.

Undoubtedly, holidays play a big role in puples lives. It is time when children can relax from hard school work. Many students like summer ~~because there are holidays~~ for holidays. Anyway, there is an important question, associated with this issue. Shold students have a long summer holiday or should terms be longer? 18

Of course, for learning is better if terms would be longer. Sometimes teachers do not have enough time to give puples all material that school programm suggests. If children would study more, they will be cleverer, will pass the exams, will enter the university and will get a good job in the future. Each parent wants his child will be a reach successful person. Therefore it needs terms to be longer. However, children are not robots. They can not study without relax. Every student like summer holidays, because he can do what he wants. For example, walk with friends, do sport, read books, go to the seasid with family and do many other things. Therefore, summer holidays should be longer. 20

I can not imagine my life without study and relax. Also, it is very important to keep a balance between them. It needs to be a time for relax and time for learning. I believe, that students should have holidays (1 week) once a month. It will help to keep a balance between study and relax time.

Essay

Education is a significant part of person's life. No doubt, the more you practice and learn the more you know. During the whole time since entering the university students recieve a lot of knowledge and skills, which will be useful, when they will try to get a job. But we should never forget about rest. Holidays are good opportunity not to worry about stress and endless exams, homework, projects, they are thinking during the whole terms. It is a time, when students can do what they want. So, should students have a long summer holiday or should terms be longer?

Undoubtedly, the process of learning should be full. All universities have their own big program for each of disciplines. It is important to tell students about different aspects of the specialization, they have chosen, but it will be impossible, if terms are short. On the other hand, summer holidays also can't be shorter. During the study year students all time spend to complete tasks and projects, to prepare for final exams. There is can be little holidays, due to celebrating New Year or Christmas, for example, but it is not enough. Summer holidays are the only way to go for a vacation with family, meet friends, without stressfull thoughts about tests.

In conclusion, I would like to say that students should have a long summer holidays, because it is important time, which they can spend on self-development, try different activities, learn out what they like, In addition, there is another advantage of long holidays. It is great opportunity to find a job, search for different companies and make an significant decision which will influence on future life.

Summer is the season of joy for students. Of course, the learning process in this period of life should be more important than anything else. The problem is that during summer holidays many students do not study by themselves and, as in result, ~~they can remember nothing when the new~~ when the new school year starts, they can remember nothing of education program. That's why I consider that terms must be longer instead of summer holidays. One or two weeks of vacation surely help students to relax and they do not forget school education program.

Leisure activities during terms and summer holidays varies on which season it is. Surely, there are some activities that you can do in any time of yeear. For example, you can go for a walk with your friend or do shopping. Summer season is a great time to ride a bicycle or swimming. There is some unique activities for winter too: during summer you can not to ice skating or skiing. Personally I think that every season is a great opportunity to try something new in life and get unforgatable joy

Summer holidays is also a great time for travelling. You can visit nearest cities by car or even go to another country by aircraft! This is an opportunity to learn ~~something new~~ about new cultures, meet ~~new~~ interesting, make new friens and selfeducate at all. I would like to visit every country in the world during my life.

~~A#~~ School education is an important part of everyone's life. Moreover, there are a lot discussions about school programm nowdays, as our society needs more smart people. However, there are also ~~talkings~~ discussions about ~~relax~~ importance of relaxation. and holiday
(~~As for school~~ so)

By the way, let's take a look on advantages of long terms and long summer holiday. During long terms students can learn about subjects more that makes them smarter. Also, students get an opportunity to make their subjects marks higher. As for longer summer holiday, children relax more and get a chance to spend the holiday more interesting. For example, travel around the world or go camping with friends. Although, students can study at home interesting subjects, which they don't have at school, such as foreign languages. and art subjects.

However, there ~~is~~ are some disadvantages of them. Students feel more exhausted if they'll study longer terms. and as a result they might miss lessons at school or become not interested in. studying. As for holidays, a lot of relaxation makes people lazy for work and study. Student can forget school programm during holiday ~~that~~ makes no sence in study.

To my mind, it'd be great if schools have a few not that long terms and have holidays that repeat every one or two months. I mean, for example, five or six terms and four-five holidays which last one-two weeks. I guess, students will have time to get their life together, and what's important they will study faster and feel happier. 227

ДИПИ- 10-312-3

The subject of education has always worried the public. Every country has its own education system with laws defining the amount of time students are given for learning and rest. However, people still have different views on this subject. I personally think that students should have a long summer holiday and this essay will provide arguments for my position.

Firstly, I think that "long holiday is better for learning because it will help to prevent students from feeling lack of motivation. Without the proper rest students will feel exausted and their productivity will decrease. ~~and their education process will lose its quality~~.

Secondly, students can do various leisure activities during their holidays. ~~Some of them can take a lot of time~~ for example, visiting relatives or going on a long trip abroad can be rather time-consuming. Short holidays will not be able to provide enough time for creating long-lasting memories and accomplishing all the activities students want to take part in.

Lastly, in some regions weather conditions in summer can be awful. Staying inside the classroom and wearing school uniform can be impossible because of the heat and humidity. What is even worse, some schools are not able to supply their classrooms with air conditioners because of lack of financial support, technical specialists or space in the rooms. These aspects can disture students and decreace the effectiveness of studying.

To sum up, long summer holiday is definitely better than having longer studying terms because of giving students more time for their leisure activities, preventing students from the lack of productivity caused by feeling exhausted and weather conditions.

Should students have a long summer holiday, or should terms be longer?

In my opinion, there's no need to make holidays or terms longer. I think, there is enough time on holidays ~~to~~ for students not only to enjoy free time, but also to prepare for future studying process. ~~For example~~

And ~~if~~ talking about free time, there are a lot of leisure activities you can do on holidays. For example, you can hang out with your friends on the beach, or go hiking ~~with them~~ with them and see some beautiful nature landscapes. Also you can ~~fly to another country with your family to meet ours~~ If you are a quiet person, you would like to go fishing, maybe you can take your parents with you because this is much funnier than sitting in front of water all alone. Besides of that, you can invite your friends to game night and play board games or watch a movie with them. You can do sports, like basketball or swimming with them. There are plenty of ~~activities~~ activities you are free to do, you just need ~~to~~ a good company and good mood.

But besides of enjoying your holiday free time, it is important to save time ~~to~~ for ~~preparation~~ school preparation. By the preparation I mean repeating school material to be more prepared for future education process and to ~~burn~~ be involved into work more quickly. It ~~will~~ also will ~~help you to learn new material~~ make your learning process more efficient and you will never find it difficult to learn something new.

Nowadays people argue if it worth having a long summer holiday or it is better to ong school terms.

From my point of view, there is no necessarity for longer terms because all the students spend loo much time at school trying to impore their skills. That is why summer holiday is the best ap-portunity for them to spend enough time with their nearest and dearest. In addition, as our ives are very busy nowadays, we can not do without travelling and summer is the best season o do it.

However, many disbelievers consider that if you want to be successful in life you should ot lost any apportunity for studying. Moreover, you may spend enough time with your iriends communicating with them at school. More than that, there is a great amount of school ourneys to different cities of our country and even abroad during the school year. So the students will not feel a lack of travelling.

Frankly speaking, I disagree with them because if you want to continue your studings you may start your self-education using different electronic devices like phone, computer and many others. As for travelling, I have already mentioned above that summer is the best season for it. All the students enjoy sunbathing and eating ice cream with their friends

To sum up, I think there is no harm to study as much as possible. But we should not remember that everyone should have an apportunity for the good rest.

In our society it's confirmed that holidays mean a lot to our students and dear teachers. Everyone deserve a good rest after the hard monthes full of work and lessons. But some people are not satisfied with the system of terms and holidays. Some people want to rest more, other want to get more useful information.

My attitude to this system is quite positive. Every term me and my classmates have a normal amount of homework, lessons and free days. I don't think we will able to accept longer ~~holidays~~ ~~terms~~. terms. So, I don't see a real need to change anything in our education system.

But some students want to have ~~more~~ longer holidays. That's understandable, leisure activities on holidays have a great influence on our phythical and mental health. It's also noticed that after a good rest students start to miss old school days and their attitude to education changes in a good way after that.

I find long holidays kinda ~~not~~ problematic. Usually students start to forget the important knowledges. By the way the feeling of responsibility also start to degree.

So, in conclusion I'd like to say that harmoniously organized ~~created~~ terms and holidays can make students ~~leo~~ lives more interesting and remarkable.

It would be not exaggeration to say that most modern people want to relax as much as possible. But in order for the level of education in the world not to fall, everyone must rest for a limited period of time. I reckon that students should have a long summer holidays because after studying for almost nine difficult months, the child should completely reboot and relax. Someone may say that during the summer holidays the child becomes lazy and too relaxed, but I don't agree with this.

Speaking of leisure activities on holidays, I can say that there are many types of recreation. Someone spends time at home, reading books and doing mental activities, someone goes to travel to another country, someone goes to the village to visit grandparents.

Also, I'd like to say that holding exams for children in the summer holidays is not a reasonable decision because the weather conditions (heat) make it very difficult for children to concentrate.

First of all, I think that we don't need too long quarters to study, because probably everyone noticed that at the end of the quarter you are already tired and can't perceive much nomally. On the other hand, during the long summer holidays children often often forget a lot, but they come rested and with new strength to study.

I think that you need to rest more during the holidays, but still in order not to come to school with an empty head, you need to repeat the chool material at least once a week.

On vacation I go out with friends, we go to the cinema, theaters.

On the weekends I read a books.

I think, students should have a long summer holiday, but for learning it's better that terms are longer. Because if u have bad marks, you have more time to have good marks. On holidays you can do whatever you want and wherever you want. You can go for a walk with your friends, you can study some lessons u need at school. Or you can go on vacation abroad and practice there your english or whatever. When you spend ur time out of school with ur friends, anyway, you somehow communicate with them. You are discussing some different topics. It can be politics or your family or your vacation, I don't know, to go to the cinema, have a slumber party. There are a lot of things u can do on summer holiday. Eventually, to have rest from school. In school you are usually nervous or scared, bad marks make you annoyed, mom says to you that you could be more as you are and it's all very difficult for students. In fact, it depends on people, somebody wants a long summer holiday, somebody wants school terms to be longer. So, this is people's choice anyway.

Should students have a long summer holiday or Should term be longer?

I think that for learning is better to make terms longer because the students will study more material, but they will get tired more faster, that it is not good. Also, probably, students will study less than 11 years ~~Dang~~. That's why they will have 2 years before army. But student will loose the feel of relax, they would not go for a walk in summer, swim in river etc. Also they will loose the possibility to talk with friends relatives, ~~help to~~. They ~~couldn't~~ wouldn't help their grandparents, ~~that~~, why also they wouldn't relax as much as need that it's why, I think, that we should stay 3 mounths of summer holiday, because children study 9 mounth every day(except the Sundays and autumn holiday, winter holiday, spring holiday) and they aren't robots, they also need to relax and to have guest. Also I think that the autumn spring holiday should be longer for 1 week. So I think that the students should have a long ~~s~~ summer holidays. That is all I wanted to say

I was really surprised when I read the e-mail. Its content was about big fires near from my town. ~~I was~~ After the reading of that e-mail I watched TV to find this information. There ~~isn't~~ wasn't any news about big fires near from Khabarovsk. Then I didn't find any information in internet about it. So I understood that e-mail message was a fake! I was angry, because there are a lot of other people who trusted this spam. For example, grandfathers and grandmothers, or children.
I want to say that you shouldn't trust all information yourself, because nowadays there are a lot of bad people who want to creep others or do ~~some think~~ harm for them.

Writing:

I was really surprised when I read the e-mail. I want to tell a little story from my life. When I was a little girl, my mom went to the shop and I went with her. The shop was very huge for little me. When my mom was choosing products, I decided to find my favorite chocolate. I didn't say it to my mom and went away. There were a lot of different people, so I was scary and lost the way by that I went. I started cry and one women, who was a stuff of shop, found me and helped. She started to ask a lot of questions about my parents, but I couldn't say anything. After some minutes this women said something to her phone and my mom came and gave thanks. I was so happy when my mom found me and we went home. So ~~ort~~ the advice of a day: don't walk away from your parents or close people, if you don't know the area, where you're standing. Have a good day, boys and girls, read this magazine and don't be sad.

I was really surprised when I read the email.
The e-mail ~~sayet~~ was said that if I will open the page, which was
written in the email, I will get one thousand of dollars!
Of course I did that, but I didn't get my money! In the
screen I saw that my account was broken off! I was afraid,
I always safed all my important ~~fails~~ files. in this account!
I ~~was~~ trying to fix that, but I couldn't. I understood, that that
email was liars! It was a great shame that I couldn't
understand that earlier. People who see that, please never open
links like that, it's a really lie. It was my the biggest mistake
of whole my life.

I was really surprised when I got the ~~letter~~ e-mail, that was sent to my by ~~my~~, as I thought, friend. It was a nice spring day. Birds were singing, flowers were blooming. I was heading home from my part-time job. Very tired, but happy, because I got a promotion and I've met a very, very nice guy, who had the same interests as me. Soon we became friends and he asked for my e-mail adress. Of course I gave it to him, because I thought it was a start for something new. But I was wrong.

The letter I got was terrifying. Somehow he knew my personal information and my deepest secrets. He asked me for money, so he would keep everything he found in secret. I don't know where he get my personal information and because of that I was too scared to think, so I phoned my best friend. In tears I told her everything and asked her for advice. She told me to calm down and go to police office. I did just as she told me to do and few hours later that creep was arrested. Even so, from now on I'm still too scared to talk to strangers even if they seem nice at first sight.
